I knowingly and voluntarily choose the quite dangerous option of:

- [a] reduce the course weight of Exam #2 so that it equals zero percent, thereby eliminating my earned Exam #2 grade, including its extra credit essay grade;
- and
- [b] forfeit the opportunity to earn a course letter grade of "A-" by the end of Exam #3;
- and
- [c] require myself to take the Final Exam;
- and
- [d] increase the course weight of the Final Exam from 40% by adding to it the course weight previously assigned to Exam #2 (i.e., 20%) so that the Final Exam now will have a course weight of 60%;
- and
- [e] replace that earned Exam #2 grade with +0.1 extra credit points.

CIRCLE ONE OF THE TWO OPTIONS BELOW

Keep Exam #2 grade.

Forfeit Exam #2 grade in exchange described above in [a] through [e].

Completion (i.e., no blanks left on this form and no non-good faith errors in the worksheet) **of this extra credit opportunity earns a student +0.1 extra credit points.**
